Amrit Vihar,Burari,Delhi,India(110084)

OBJECTIVE

Full Stack Developer with 1 year of experience in designing ,developing and maintaining scalable web applications. Proficient in front-end and back-end technologies,including Node.js,MongoDB,Express.js etc.And passionate about optimizing performance and user experience.

Skills and Abilities

HARD SKILL	SOFT SKILL
- HTML - CSS - Tailwind - Javascript - Bootstrap - React.js - Next.js - Node.js - Express.js - Python - Sql - Mongodb - Django	- Leadership - Team Player - Strong Verbal Communication - Strong Written Communication - Analytical Mindset - Active Listening and Adaptability - Detailed Oriented - Decision Making Skills - Result Oriented - Logical Thinking - Proactive

WORK EXPERIENCE

April 2024 - Present,**AnAcad**
Full Stack Developer

Collaborated with a team to design and develop a **role-based access control** system using the **MERN** stack.

Oct 2024 - April 2025,**Orangus Pvt. Ltd.**
Full Stack Development intern

Assisted Industry Experts in Development, Testing and Deployment of web applications using **MERN Stack Development.**

EDUCATION

2026,**Bachelor of Computer Application Delhi,India**
Indira Gandhi National Open University

2023,**12th Class,Roop Nagar,Delhi**
Govt Girls Sr Sec School No.1

2021,**10th Class,Sant Nagar,Delhi**
Mount Olivet School

PROJECTS

Project : Real-Time Chat Application

    Tech Stack: Next.js, Node.js, Express, MongoDB, Socket.io, JWT, Nodemailer, React-Toastify

- Developed a real-time chat application enabling instant messaging using Socket.io.
- Implemented JWT authentication with custom validation for secure user access.
- Integrated OTP-based password recovery via Nodemailer.
- Used React-Toastify for real-time notifications on messages and login status.
- Ensured seamless API communication with Axios and CORS handling.
- Implemented a real-time search functionality to quickly find friends.

Project: Secure Auth System – Next.js & Node.js Authentication

    Techstack: React.js, Next.js, Express.js, MongoDB,JWT, Nodemailer, React-Toastify

- This is a full-stack authentication system built using MongoDB, Express.js, React, and Node.js (MERN) with a secure user login and signup process.
- The system implements custom validation, JWT authentication, OTP-based verification using Nodemailer, and password reset functionality to ensure security and user experience.
- Built with modern best practices, it can be used as a boilerplate for any secure authentication system in MERN stack projects.

Project: Notes Application

    Tech Stack: Next.js, Node.js, Express, MongoDB, JWT, Axios

- Developed a Notes App with JWT-based authentication for secure user access.
- Implemented a folder-based system for organizing and managing notes effectively.
- Provided CRUD functionalities (Create, Read, Update, Delete) for notes.
- Ensured data security using custom validation and protected routes.
- Optimized API communication with Axios and managed CORS policies.

CERTIFICATIONs

- **New York Jobs CEO Council Software Engineering Completion Certificate**
- **Skyscanner Software Engineering Completion Certificate**
- **Hewlett Packard Enterprise Software Engineering Completion Certificate**
- **City of Moreton Bay Entrepreneurship & Innovation: Web Development Completion Certificate**
- **Accenture Developer and Technology Job Simulation**
